

BIRTHWELL PARTNERS BIRTH OUTCOMES 2022

In 2022, BirthWell Partners doulas attended births with 53 pregnant clients and babies (there were no twins this year). Of these clients, 14 identified as White, 34 as Black, 3 Multiracial, 1 as Native American, and 1 as Asian. 4 clients identified as White-Hispanic and 1 as Black-Hispanic. Below are our outcome data, side by side with corresponding data for national, state of Alabama and Jefferson County outcomes for 2022.

Measure	National	State of Alabama	Jefferson County	BWP	
Number	3,667,758 ¹	58,162 ¹	7,749 ²	53	n
C-Section Rate (%)	32.2 ¹	34.5 ^{1a}	35.14 ^{2*}	31.40 ^{**}	51
White	31.1 ¹	34.1 ^{1a}		30.77	13
Black	36.8 ¹	38.4 ^{1a}		30.56	37
Epidural Rate (%)	77.19 ^{1a}	87.3 ³ (2016 data)		58.82	51
Average Gestational Age (weeks)				38.89	53
Average Birth Weight (lbs)				6.84	50
Pre-Term Births (%)	10.38 ¹	12.84 ^{1a}		7.55	53
White	9.44 ¹	11.42 ^{1a}		7.14	14
Black	14.58 ¹	17.1 ^{1a}		8.11	37
Low Birth Weight (%)	8.6 ¹	10.4 ^{1a}	11.5 ²	12.00	50
White	7.12 ¹	7.93 ^{1a}	8.2 ²	0.00	13
Black	14.75 ¹	16.55 ^{1a}	15.7 ²	17.14	35
Ever Breastfed (%)				93.75	49
White				100.00	12
Black				91.18	34
Breastfeeding at Discharge (%)	85.2 ¹			100.00	42
White	86.4 ¹			100.00	12
Black	76.8 ¹			100.00	28
Skin to Skin (%)				96.00	50
Induction Rate (%)	31.9 ¹			42.31	52
Augmentation ^a	20.8 ^{1a}			32.00	50

Note that we are missing some outcome data. We have included the n for each data point so that you can see where data are missing. The n in the far right column represents the total number of clients with complete data on that variable.

*Note that the AL Vital Statistics Report (ref 2), gives rates for each hospital in our county. The c-section rate in this chart reflects those numbers. Thus, we report the rate for all babies BORN in Jefferson County, rather than the rate for RESIDENTS of Jefferson County.

Doula support can help reduce the chance of a c-section by providing one-on-one care during labor and birth. Doula support during labor cannot impact decisions made before labor begins. Since our data set is small, the 4 clients with planned c-sections have an outsized impact on our outcome data. To better reflect the impact of doula support, we calculated our c-section rate again after **excluding the 4 births that were planned to be c-sections before labor started. With these births excluded, our c-section rate for the remaining 47 clients is **25.53%**.

^a Augmentation represents the administration of Pitocin during labor in order to augment contractions.
